

Dear UEFI Enthusiasts, IHVs, OEMs and Firmware Developers,

On behalf of the UEFI Testing Working Group (UTWG) from the Unified EFI Forum (UEFI), Phoenix Technologies invites you to the EFI Byte Code (EBC) Summit. The **EBC Summit will be held from February 27 to March 1, 2007 at the Phoenix facility in Milpitas, California USA.**

This event provides the industry with an opportunity to conduct focused interoperability testing on the EBC functionality portions of the UEFI 2.0 specification. The EFI Byte Code allows UEFI drivers and applications to execute on a wide range of CPU architectures without recompilation.

This event is open and free to all attendees from companies that are UEFI members, but registration is required. We encourage companies who are not yet UEFI adopters or contributors to sign up at <http://www.uefi.org> and participate.

Participants in the event include UEFI members who are Add-in card Vendors, Operating System Vendors, Independent Software Vendors, Independent BIOS Vendors and Original Equipment / Design Manufacturers (OEM / ODM) platform vendors.

Please respond to John MacInnis (john_macinnis@phoenix.com) by February 2, 2007 to let us know your participant status in this event.

Upon receiving your participation response and interest, we will send you a logistics package to help you prepare for a successful test event.

If you know of other groups or divisions in your company that would benefit from attending, please forward this letter to them.

We look forward to seeing you in Milpitas!

Regards

A handwritten signature in blue ink that reads 'Dong Wei'.

Dong Wei
VP and UTWG Chair
